What does a Summative assessment Individual Student Report (ISR) look like and how can I read it?

Please note: ISRs have been updated for the 2022-2023 administration and the appearance may deviate from previous years.

An Individual Student Report (ISR) is a report in PDF format that displays data on an assessment. It may consist of a single page or multiple pages. ISR layouts vary according to the type of assessment. See figures on the following pages for sample ISRs.

At the top of each ISR are the student name and SSID, the name of the assessment, LEA, and school, and any other relevant information.

ISRs also include scale scores and performance distribution for students.

- A scale score makes it possible to compare one student’s score to another student’s score, even if they didn’t respond to the same questions.
- Performance distribution is given using proficiency. Proficiency levels describe how your student applied the content-specific knowledge and skills outlined in the Utah Core State Standards demonstrated in Utah’s statewide assessment.
  - Below Proficient
    - Performs significantly below grade-level standard
    - Able to partially access grade-level content
    - Engages higher-order thinking skills with extensive support
  - Approaching Proficient
    - Performs slightly below grade-level standards
    - Likely able to access grade-level content
    - Engages in some independent higher-order thinking with support
  - Proficient
    - Performs at grade-level standard
    - Able to access grade-level content
    - Engages in some independent higher-order thinking with minimal support
  - Highly Proficient
    - Performs significantly above grade-level standard
Able to access grade-level content
Engages in independent higher-order thinking skills

Below that is a summary of the student’s performance. An ISR for a scale-scored assessment displays the student’s performance on a vertical scale that includes all the cut scores and performance levels.

Each ISR includes a comparison table showing the average performance of the LEA and/or school.

Many ISRs include a table detailing the student’s performance in each reporting category.

Some ISRs include item-level data, scoring assertions, scoring assertion outcomes, and trend reports (Longitudinal Reports).
Figure 191. First Page of Individual Student Report (ISR) for Math Summative Assessment

- **Student name, ID, date of birth, and enrolled grade**
- **Name of the test**
- **Student's LEA and school**
- **Summary of performance**
- **Vertical scale showing student's overall score and performance level**
- **Comparison table showing average performance of the LEA and school**
- **Student's performance in each reporting category**
Figure 192. First Page of Individual Student Report (ISR) for ELA Summative Assessment

- **Student name, ID, date of birth, and enrolled grade**
- **Name of the test**
- **Student’s LEA and school**
- **Summary of performance**
- **Vertical scale showing student’s overall score and performance level**
- **Comparison table showing average performance of the LEA and school**
- **Student’s performance in each reporting category**
Figure 193. First Page of Individual Student Report (ISR) for Writing Summative Assessment

- Student name, ID, date of birth, and enrolled grade
- Name of the test
- Student's LEA and school
- Raw Score
Figure 194. First Page of Individual Student Report (ISR) for Science Summative Assessment

- **Student name, ID, date of birth, and enrolled grade**
- **Name of the test**
- **Student’s LEA and school**
- **Summary of performance**
- **Vertical scale showing student’s overall score and performance level**
- **Comparison table showing average performance of the LEA and school**
- **Student’s performance in each reporting category**
